LIFECHARTER COMMAND SUITE™ · PRESENTS

The Command Shift MasterClass Workbook

From Hustle to Command

HOW TO USE THIS WORKBOOK

- Print it and write by hand, or open it on a tablet or computer and type straight into the boxes.
- Page 2 is about your guide. Pages 3 to 7 are for the live session, and I will call out the page number each time we write.
- Pages 8 to 10 are yours to finish this week. They turn today into your seven-day plan.
- Bring one real business issue, exactly as it is. The honesty is where the value is.

MEET YOUR GUIDE

AmiLynne “Babs” Carroll

Chief Travel Partner & Alignment Architect

Travel Partner for the inner journey. Alignment Architect for your life’s work. Babs helps people hear what is true for them and design a life that reflects it, and coaches founders and leaders to align their mission, brand, money and daily work, from Truth rather than fear.

HER STORY

Clarified, not silenced.

Babs is the Chief Travel Partner and Alignment Architect behind LifeCharter and LifeCharter Command Suite. Her work lives at the intersection of spiritual depth and practical action, helping people quiet the noise, hear what is true for them, and create the structure to live from that clarity.

In October 2022, a stroke left Babs quadriplegic, profoundly changing the way she moves through and experiences the world. It also deepened her understanding of surrender, resilience, identity, and grace. The experience did not silence her voice. It clarified it. Today, she continues to coach, create, write, lead, and speak with her service dog, Beau, faithfully beside her.

At the heart of her work is a simple conviction: clarity creates freedom. When we become clear about who we are, what matters, and what is ours to do, we can begin building a life that reflects it, one aligned action at a time.

WHY THIS WORK MATTERS TO ME

I have seen what happens when a growing business depends too heavily on one person to remember, decide, translate, and rescue. Founders are often not lacking vision. They are carrying too much of the operating system inside themselves. I created this work because founder-led should not have to mean founder-held.

01	**Clarity before acceleration**
02	**Ownership before delegation**
03	**Rhythm before reminders**

Your One Real Issue

Choose one real business issue and keep it in front of you for the whole hour. Not a hypothetical. A recurring bottleneck, a messy decision, a team confusion, a dashboard you wish existed. If you can, make it the part of your business you least like looking at.

THE ONE REAL ISSUE I AM WORKING ON TODAY

THE PART OF MY BUSINESS I LEAST LIKE LOOKING AT

WHAT I WOULD LOVE TO LEAVE WITH TODAY

You can't command what you refuse to look at.

DIAGNOSTIC · ABOUT 90 SECONDS

Are You BURIED?

Look at your own week. Circle the two letters that cost you the most time. Just two. They are not personality problems. They are architecture clues: they tell us where the business is asking for structure.

B	**Bottlenecked decisions** Decisions that are waiting on your approval.	☐
U	**Unclear priorities** Priorities that are fuzzy across the team.	☐
R	**Recurring problems** Problems that never stay solved.	☐
I	**Invisible business health** You can't see how things are actually going.	☐
E	**Effort without acceleration** More effort every month, and the business does not speed up.	☐
D	**Direction lost in operations** Your vision got buried under the day-to-day.	☐

MY TWO LETTERS

WHAT THESE TWO TELL ME ABOUT WHERE MY BUSINESS IS ASKING FOR STRUCTURE

SKILL 1 · ABOUT 4 MINUTES

The 5-Minute Bottleneck Scan

Take the one real issue from page 3 and map four things about it. One rule. Do not try to solve your whole business in four minutes. Turn one repeated issue into one visible rule.

1 WAITING POINT
Where does it pause? Where does it sit and wait?

2 OWNER
Who decides? If the honest answer is “me,” write “me.”

3 MISSING SIGNAL
What should be visible that is not visible today?

4 DECISION RULE
What rule, if it existed, would stop this from coming back?

More effort speeds up a broken system. Architecture changes how the system moves.

MY ONE VISIBLE DECISION RULE

SKILL 2 · ABOUT 5 MINUTES

Name Your True North

Your mission is permanent. Your True North is one sentence, for this season only: the heading that tells every tactic where to point. Write it rough. A rough sentence you will see daily beats a perfect one you will forget.

1 LOOK Go back to your two BURIED letters on page 4. Your True North is often hiding right underneath one of them.

2 WRITE One sentence. Not a paragraph. For this season, not five years from now.

This season is about

3 TEST Read it back. Does it tell you what to say no to? That is the real test of a True North.

☐ Yes, it makes my next ten decisions easier.

WHAT IT HELPS ME SAY NO TO

4 KEEP Decide where your eyes will land on it every morning: the top of your calendar, the top of a one-page command view.

Clarity isn't knowing everything. It's knowing what matters most.

SKILL 3 · SEE IT CLEARLY · ABOUT 10 MINUTES

The 12-Dimension Command Scan

Score each area from 1 to 5. A 1 means unclear or reactive. A 5 means visible, owned, rhythmic, and improving. Do not overthink it: your first instinct is the signal. Then check your two lowest, and star your highest.

	SCORE	LOW 2	★ TOP		SCORE	LOW 2	★ TOP
Marketing		☐	☐	**Leadership**		☐	☐
Sales		☐	☐	**Vision**		☐	☐
Operations		☐	☐	**Product**		☐	☐
Finance		☐	☐	**Customer Experience**		☐	☐
Team		☐	☐	**Legal**		☐	☐
Systems		☐	☐	**Sustainability**		☐	☐

> Founders overrate the parts of the business they enjoy and quietly skip past the parts they do not. Not out of dishonesty: out of self-protection. A real map beats a felt sense, so score honestly.

WHICH OF MY TWO LOWEST DID I WANT TO SKIP PAST WHILE I WAS SCORING? SIT WITH IT. DO NOT FIX IT.

DOES MY TRUE NORTH POINT AT ONE OF MY TWO LOWEST?

Create a Decision Threshold

A decision threshold tells your team three things: what they can decide, what they must surface, and what needs you. Take the issue from your bottleneck scan on page 5 and write one Green, one Yellow, and one Red decision. Just one of each.

THE ISSUE I AM USING

GREEN · Team decides and reports in rhythm

Example: a standard client change within scope.

YELLOW · Team decides after checking a signal or boundary

Example: an exception that affects margin, timeline, or a client promise.

RED · Escalate before deciding

Example: legal risk, brand risk, major financial impact, a strategic reversal.

If you finish this by Friday for your real business, your team will feel it on Monday. Decisions stop waiting. Your people stop hovering. And you stop being the emergency room.

Your Weekly Command Rhythm

A rhythm does not need to be complicated. It needs to be visible, repeatable, and connected to the decisions that matter. A predictable rhythm is a kindness to you and to your team. One line per day, and keep it light.

MY TRUE NORTH (TOP OF MONDAY)

Monday Set priorities	
Tuesday Clear blockers	
Wednesday Inspect signals	
Thursday Adjust ownership	
Friday Capture learning	

MY WEEKLY QUESTION: WHAT MUST BE TRUE BY FRIDAY FOR THIS WEEK TO BE A SUCCESS?

BEGIN BEFORE YOUR NEXT CALENDAR WEEK STARTS

Your 7-Day Command Starter Plan

The goal is not perfection. It is one piece of architecture that removes one piece of founder dependency. Check each day off as you go.

DAY 1

- [ ] **Name your top BURIED pattern**

DAY 2

- [ ] **Map one recurring bottleneck**

DAY 3

- [ ] **Write your True North**

DAY 4

- [ ] **Create one decision threshold**

DAY 5

- [ ] **Choose three command signals: the three numbers or facts that reveal the truth**

DAY 6

- [ ] **Set one weekly command rhythm**

DAY 7

- [ ] **Review, refine, and repeat**

> Take a screenshot of this page, or keep it where you will see it. This plan is yours, whether you ever work with me or not.
